stem Center

science & technology
enhancing medicine

Laboratory Name: Stem Center S.L.U. (Cell Biology Lab)

Contact Name: Asunción Sánchez; Severiano Dos Anjos;

Address: Camí dels Reis 308; Hospital Quirón Palmaplanas, 07010 Palma de Mallorca, Spain

Telephone: +34 971 91 00 74

E-mail: manager@stem-center.com, severiano.dosanjos@stem-center.com;

Lab Facilities Description (250 words):

Stem Center's Lab is located at Palmaplanas Hospital (Palma de Mallorca, Spain). The tissue processing laboratory extends over an area of around 100 m² and houses different processing equipment and advanced cell biology technology. This laboratory is equipped among other equipment, with laminar flow hood, cytometer image, phase contrast and fluorescence microscopes, incubators, centrifuges, endotoxin measurement device, refrigerators, freezers, etc.

The Stem Center Lab is committed to analyze and check all samples obtained using our proprietary technology in the operating room. Furthermore, we are involved in scientific projects based on freshly obtained regenerative cells from different tissues, focusing on human adipose tissue.

Animal Facilities (Yes/No): No

Type(s) of Animal(s): Not applicable

Type of Research: Autologous adipose-derived and cancellous bone-derived stromal cells for clinical application.

Funding: Privately funded

Research Fellowship Available: (Yes/No): Yes

Primary Investigator's Name: Ramón Lull MD, PhD

Project Title: Fresh cell therapies for clinical application

Brief Project Description:

Stem Center is devoted to developing effective cell therapies using freshly obtained cells using our innovative tissue processing devices. Our patented technology is able to efficiently process different tissues for cell isolation at the point of care in a short time (around an hour) using standard laboratory equipment.

Opportunity for student degree program (Yes/No): No

Funding available from supervisor – if yes, include details: Not applicable

Other Requirements: Not applicable
